

EcoDesk Smarter Workplace Buying Guide

Fictional training resource. Prices, business details and recommendations are synthetic.

The 12-point planning checklist

1. Define team size and expected attendance pattern.
2. List focus, collaboration, call, learning and visitor tasks.
3. Record accessibility and individual-adjustment needs.
4. Confirm usable floor area and fixed building constraints.
5. Map power, data, lighting and circulation constraints.
6. Rank workpoints by frequency and business importance.
7. Set a whole-project budget, not only a product budget.
8. Request dated product specifications and quotations.
9. Compare options using the same criteria and evidence.
10. Pilot the highest-risk assumptions with a small group.
11. Record human approvals, dependencies and rollback options.
12. Review feedback and actual usage before expanding.

Bundle comparison worksheet

Option	Intended users	Task fit	Adaptability	Indicative cost	Evidence gaps	Decision
Focus workpoints						
Hybrid team bundle						
Phased growth plan						

Questions for a supplier

- Which specifications support each material claim?
- What is included in delivery, installation and after-sales support?
- Which assumptions drive the proposed quantity and layout?
- What accessibility, safety or facility checks remain?
- What can be piloted before a wider commitment?

AI prompt for a first-pass brief

Using only the supplied team, task, space and budget facts, create three workplace-plan options. Separate facts, assumptions and evidence gaps. Do not invent wellbeing, productivity, environmental or compliance claims. Return the options, trade-offs, questions, human checks and recommended next action.
